

## NYCStat Stimulus Tracker Project Description

<b>Funding Source:</b> Efficiency and Conservation Block Grant (EECBG) DE-EE0000692 <b>Project Name:</b> Energy Audit Program
----------------------------------------------------------------------------------------------------------------------------------

***Purpose / Description***

<b>Funding will be used to:</b> The EECBG funding will allow the City to complete energy audits for up to 300 buildings.
--------------------------------------------------------------------------------------------------------------------------

***Location***

<b>Identify the project’s location:</b> Various locations Citywide. 100 City buildings have been identified, to date, for the first round of energy audits.
-------------------------------------------------------------------------------------------------------------------------------------------------------------

***Benefits***

Energy audits will allow the City to identify, in a comprehensive manner, the most-cost effective energy conservation measures to implement in City buildings to reduce energy consumption, energy costs, and greenhouse gas emissions. The audits funded through EECBG is estimated to result in over \$135 million worth of energy retrofit projects to be covered with City funding through Executive Order 109. These audits alone (not including the resulting retrofits) are estimated to create 58 jobs.
-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

***Impact of ARRA Funds on this Project***

Energy audits will allow the City to identify, in a comprehensive manner, the most-cost effective energy conservation measures to implement in City buildings to reduce energy consumption, energy costs, and greenhouse gas emissions. The EECBG funding will cover two years worth of energy audits, displacing the need to use City expense funding for these projects, thereby allowing more capital projects (the implementation of audit recommendations) to move forward more quickly.
-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

***City Agencies***

<b>Primary:</b> DCAS <b>Other:</b> DOE, SCA, BPL, HHC, DOC, HRA, DPR, DCLA, NYPL, CUNY, EDC and DJJ for the first year.
----------------------------------------------------------------------------------------------------------------------------
